

NEW PRODUCTS AVAILABLE

Halco's **Emergence die-cast aluminum LED exit sign** combines rugged durability with refined design - perfect for commercial and institutional spaces.

- High-strength die-cast aluminum
- Bright, energy-efficient illumination
- Field-selectable red or green stencil face
- Single or double face, universal ceiling/end/wall mount
- Chevron indicators included
- Universal input voltage
- Now with selectable AC or Emergency mode
- Choose Manual Test or Self-Diagnostics

With 90 minutes of egress lighting after a power loss, it's built for code compliance and built to last.

The **Center Basket Troffer** family offers sleek, modern LED troffers and retrofit kits designed for:

- New construction
- Remodels
- Quick retrofit projects

With a fully illuminated frosted acrylic center basket, it delivers even, low-glare lighting across both the floor and walls, all while concealing smart features like:

- Integrated sensor-ready receptacle
- Optional emergency battery test button

Retrofit kits make it easy to convert outdated fluorescent parabolic or panel fixtures into energy-efficient, controls-ready luminaires without hassle.

Halco's FPLCR **Flat Panel Series** is built for today's commercial lighting jobs and engineered for tomorrow's controls integration.

- DLC Premium listed
- CCT and lumen selectable
- 3.5mm audio jack for PIR & microwave sensors
- LLLC eligible
- 1x4, 2x2, 2x4 sizes
- Competitive pricing that wins jobs

Whether it's a school retrofit or a multi-floor office build, Halco panels deliver the versatility, efficiency, and pricing contractors need and distributors love.

High Output HID Replacement Lamps - Instant Savings. Zero Compromise.

Ready to ditch outdated HID lamps? These new high output LED replacements deliver:

- Quick payback
- Massive energy savings
- Long-life performance

Designed with a familiar HID shape and optimal light distribution, these full glass bulbs use high-power LED filament technology for a sleek, efficient retrofit, perfect for both indoor and outdoor applications. Easy upgrade. Fast ROI. No rewiring headaches.

The **Emergence Series Combination Exit Sign/EM Unit** is the ultimate in Life Safety versatility, perfect for hallways, stairwells, and egress paths.

Field-selectable features include:

- Red or green stencil face
- Single or double face
- Universal ceiling or wall mounting
- Chevron directional indicators
- Universal input voltage

Its low-profile design works for surface or top-mount setups—guiding occupants safely for 90 minutes after power loss. Also available with remote capacity for expanded coverage.

Sleek. Simple. Architectural. The **Surface Mount Disk Series** delivers high-end style and smooth performance for residential spaces thanks to edge-lit technology that eliminates glare and hot spots.

Available in 4 sizes (5.5" to 12"), these low-profile fixtures feature:

- Clean, surface-mount design for J-box installations
- Color selectable (2700K–5000K)
- Triac dimming for smooth control
- Durable plastic housing with steel LED back plate & PMMA lens

Whether you're upgrading a single room or planning a large-scale install, this series brings modern looks with zero compromise.

Slim Design. Serious Protection. The **Fire Rated Slim Downlight** family is built for performance where safety is non-negotiable.

Designed for fire-rated ceiling systems, these low-profile fixtures offer:

- Up to 2 hours of protection at 1100°C
- Smooth or baffled trims for a modern look
- Canless design with spring retention clips for easy install
- Remote driver box + frosted polycarbonate diffuser

Rated IC, Airtight, Fire Resistant & Wet Location, perfect for residential, multi-family, and healthcare facilities. Clean, safe, and code-compliant lighting.

Streamlined Style Meets Smart Function. The **Surface Mount Downlight Series** offers a sleek solution for any ceiling or wall, available in 4", 6", and 8" sizes with selectable CCT and dedicated lumen output.

What sets it apart?

- Concave frosted lens blends seamlessly with angled metal housing
- Color selectable, Triac dimming, and optional integral PIR sensor
- Sensor timeout is fixed at 30 seconds - no adjustment needed
- Surface mount or use with adapter kit for recessed cans (sold separately)

Contractors: save time and waste with the 24-pack bulk option. A clean, energy-efficient upgrade for any space.
